Education

Friedrich-Alexander-Universität Erlangen-Nürnberg

Master of Science in Economics

Oct 2023 – Sep 2026

Nürnberg, Germany

- **Master's Thesis at the Chair of Statistics and Econometrics:** "Tracking Inflation in the G20 at High Frequency and in Real Time: A Machine Learning Approach."

Istanbul University

Bachelor of Arts in Econometrics

Oct 2017 – Jul 2022

Istanbul, Turkey

University of Łódź

Erasmus+ Exchange in Economics

Sep 2018 – Jul 2019

Łódź, Poland

Experience

Institut für Arbeitsmarkt- und Berufsforschung (IAB)

Working Student | Data Analysis & Research

Oct 2024 – Sep 2026

Nürnberg, Germany

- Supported quantitative labour market research across the Statistical Methods (KEM) and Migration and International Labour Studies (INTER) departments.
- Prepared, validated, and analysed linked survey and administrative data (SOEP-CMI-ADIAB) in Stata and R, covering 44,000+ respondents and employment histories dating back to 1975.
- Automated the extraction, cleaning, and merging of large-scale Destatis datasets, producing analysis-ready data for senior researchers and significantly reducing manual preparation effort.
- Produced tables and visualisations to communicate research findings, contributing to the co-authored IAB report "Polnische Arbeitskräfte in Deutschland."
- Calculated survey response rates and analysed non-response patterns using data from the IAB-BAMF-SOEP survey.
- Supported causal analysis of refugee mobility policies using PSM, DiD, and regression kink designs.

Ziraat Bank

Data Analytics Intern

Jun 2021 – May 2022

Istanbul, Turkey

- Analysed customer and portfolio data using SQL and Excel to identify trends in retail banking products and account activity.
- Wrote SQL queries to extract, filter, and aggregate customer and transaction-level data for exploratory analysis.
- Prepared Excel-based reports and summaries for branch management, highlighting portfolio and customer activity trends.
- Calculated and reconciled outstanding and overdue amounts across affected customer accounts, helping identify discrepancies and assess the size of problematic exposures.

Projects

Master's Thesis | Tracking Inflation in the G20 at High Frequency and in Real Time: A Machine Learning Approach.

- Built a Python web-scraping pipeline to collect 20 years of weekly Google Trends data for 15 G20 economies, covering more than 27,000 time series.
- Preprocessed noisy high-frequency data using seasonal adjustment, detrending, denoising, and variable-specific transformations.
- Implemented a mixed-frequency U-MIDAS framework and developed LSTM, XGBoost, autoregressive, and Random Walk models for inflation nowcasting.
- Achieved the strongest overall forecasting performance with the LSTM model, reducing RMSE by 8.16% relative to the Random Walk benchmark.
- Applied SHAP values and permutation importance to assess variable importance and interpret model predictions.

Technical Skills

Programming: Python (pandas, NumPy, scikit-learn, TensorFlow/Keras), R, SQL, STATA

Tools: Git, Power BI, Tableau, Excel, AI/LLM Tools (Codex, Claude Code), LaTeX

Concepts: Data Analysis, Statistics, Machine Learning, Deep Learning, Data Visualization, Data Modeling, ETL/Data Pipelines, Time Series Forecasting, Model Evaluation, Cloud Computing

Certificates: IBM Databases and SQL for Data Science with Python (Sep 2026); AWS Cloud Practitioner Essentials (Aug 2026); Google Data Analytics Professional Certificate (Aug 2022)

Languages: Turkish (Native), English (Fluent), German (Intermediate)
